Workshop on Finding Synergies Between Texts and Networks

Call for Papers and Participation

In social computing, the structure of socio-technical networks and the content produced by these networks are inherently intertwined, but they are often analyzed separately. We invite researchers from various disciplines to discuss ways to find synergies between text analysis and network analysis.

At this workshop, we will be

- Initiating a dialogue about and in-depth look at the methodologies used in social network analysis and text analysis,
- Discussing holistic approaches for combining network and text analysis,
- Sharing and defining needs for data sets that include content and metadata,
- Illustrating informative data analysis results from the combination of text and network analysis, and
- Presenting novel applications combining text and network analysis including their validations

Workshop participants will represent a diverse set of communities including:

- Statistical natural language processing
- Computational linguistics
- Social network analysis
- Social media analytics
- Social science
- Opinion mining
- Machine learning

We welcome papers from researchers with expertise in one or more of the following topics and a keen interest in integrating network analysis and text analysis to create synergistic effects. Participants will be selected based on their technical merit and potential for contributing to the theme of the workshop.

- Combining network analysis and text analysis of social media including blogs, microblogs, social network services (SNS)
- Opinion and emotion analysis using text and network analysis
- Propagation processes using text and network analysis
- Jointly modeling networks and contents for machine learning and data mining
- Trust, reputation, and privacy in online social contexts
- Social media data collection and data repositories for content and network analysis

Prepare your manuscript with IEEE conference paper styles. (http://www.ieee.org/web/publications/pubservices/confpub/AuthorTools/conferenceTemplates.html) All papers will be peer-reviewed by a single-blind review process, and if the paper is accepted, at least one of the authors must attend the workshop to present the work. Accepted papers will be published in the workshop section of IEEE SocialCom-2010 Proceedings and the IEEE Digital Library.

Important Dates

May 8, 2010
Submission Deadline
June 1, 2010
Acceptance Notifications
June 15, 2010
Camera-Ready Deadline

Paper Formats

Up to 6 Pages Research Papers
Up to 4 Pages Work-in-Progress and Position Papers

Organizers

Alice Oh, KAIST
alice.oh@kaist.edu
Jana Diesner, CMU
jdiesner@andrew.cmu.edu

Program Committee

Edoardo M. Airoldi
Harvard University
Kathleen Carley
Carnegie Mellon University
James Caverlee
Texas A&M University
Meeyoung Cha
Max Planck Institute for Software Systems
William Cohen
Carnegie Mellon University
Jason Kessler
Indiana University
Il-Chul Moon
Korea Advanced Institute of Science and Technology
Ozlem Uzuner
State University of New York, Albany
Shinjae Yoo
Carnegie Mellon University
