A geometric diagram showing a circular sector. The sector is defined by a solid outer boundary and a dashed inner boundary. The sector is filled with a series of parallel lines that are denser near the vertex and become sparser towards the outer edge. The vertex of the sector is located on the left side of the diagram. The dashed outer boundary is a circle that passes through the vertex and the outer edge of the sector. The solid outer boundary is a curve that is concave towards the vertex. The dashed inner boundary is a smaller circle that is concentric with the dashed outer boundary. The number 278 is printed at the bottom center of the diagram.
