Chapter 1 Introduction 1

1.1 Execution Model 4

Chapter 2 Language Elements 7

2.1 Character Set 7

2.2 Lexical Syntax 8
2.2.1 Keywords 8
2.2.2 Names 8
2.2.3 Delimiters 9

2.3 Lines 10
2.3.1 `INCLUDE` Line 11

2.4 Statements and Constructs 11
2.4.1 Statement Labels 12

Chapter 3 Program Unit Parts 15

3.1 Executable and Nonexecutable Statements 15

3.2 Specification Part 16
3.2.1 Specification Statement 17

3.3 Execution Part 17
3.3.1 Executable Statements, Constructs, and Action Statements 18
3.3.2 `END` Statements 19

3.4 Executable Programs and Compilation Files 20

3.5 Main Programs: `PROGRAM` Statement 20
3.5.1 Order of Statements in a Program or Subprogram 21

Copyright © 1989–1994 Thinking Machines Corporation

Chapter 4 Data Types and Literal Constants 23

4.1 Literal Constants 24

4.2 Numeric Types and Constants 24

4.2.1 Integer Types and Constants 24

4.2.2 Real Types and Constants 26

4.2.3 Complex Types and Constants 28

4.3 Character Type and Constants 29

4.4 Logical Type and Constants 30

Chapter 5 Data Declarations and Specifications 31

5.1 Scalars and Arrays 31

5.2 Array Specifiers 32

5.2.1 Explicit-Shape Arrays 33

5.2.2 Assumed-Shape Arrays 35

5.2.3 Deferred-Shape Arrays 36

5.2.4 Assumed-Size Arrays 37

5.3 Type Declaration Statements 39

5.3.1 Numeric Type Declaration Statements 42

5.3.2 Typed Constants 44

5.3.3 `LOGICAL` Type Declaration Statement 44

5.3.4 `CHARACTER` Type Declaration Statement 45

5.4 Attribute Specification in Type Declaration Statements 48

5.4.1 `DIMENSION` Attribute 50

5.4.2 `PARAMETER` Attribute 51

5.4.3 `DATA` Attribute 52

5.4.4 `SAVE` Attribute 53

5.4.5 `INTENT` Attribute 54

5.4.6 `ALLOCATABLE` Attribute 56

5.4.7 `POINTER` Attribute 56

5.5 Attribute Specification Statements 57

5.5.1 `DIMENSION` Statement 57

5.5.2 `PARAMETER` Statement 58

5.5.3 `SAVE` Statement 58

5.5.4 `INTENT` Statement 59

5.5.5 `ALLOCATABLE` Statement 60

5.5.6 `POINTER` Statement 61

Copyright © 1989–1994 Thinking Machines Corporation

5.6 IMPLICIT Statement 61
5.7 NAMELIST Statement 63

Chapter 6 Dynamic Array Allocation 65
6.1 Declaring Allocatable Arrays and Pointers 65
6.2 Allocation Status 67
6.3 ALLOCATE Statement 67
6.4 DEALLOCATE Statement 69

Chapter 7 Expressions 71
7.1 Primaries 71
7.1.1 Constants 72
7.1.2 Variables 72
7.1.3 Substrings 73
7.1.4 Array Elements 74
7.1.5 Array Element Ordering 75
7.1.6 Array Sections 76
7.1.7 Array Constructors 81
7.2 Operations and Operators 83
7.2.1 Operations Involving Array Operands 87
7.3 Precedence and Associativity of Operators 87
7.4 Evaluation and Interpretation of Operands 89
7.5 Evaluation of Parenthesized Expressions 90
7.6 Numeric Expressions 90
7.7 Character Expressions 92
7.8 Relational Expressions 93
7.9 Logical Expressions 95
7.10 Bitwise Logical Expressions 98
7.11 Constant Expressions 99
7.12 Specification Expressions 100

Chapter 8 Storage Association and Global Data 101
8.1 Storage Association of Objects 101
8.2 COMMON Statement 103
8.2.1 Common Block Storage Sequence 104

Copyright © 1989–1994 Thinking Machines Corporation

8.2.2 Differences between Named and Blank Common Blocks 105
8.3 EQUIVALENCE Statement 105
8.3.1 Restrictions on EQUIVALENCE Statements 107
8.3.2 Restrictions on EQUIVALENCE of COMMON Variables 108
8.3.3 EQUIVALENCE of Character Objects 108

Chapter 9 Data Initialization 111

9.1 DATA Statements 111
9.1.1 DATA Statements with Implied DO Lists 113
9.2 Block Data Program Units 114
9.2.1 Order of Statements in a Block Data Program Unit 115

Chapter 10 Assignment 117

10.1 Scalar and Array Assignment 118
10.1.1 Assignment Conformance 118
10.1.2 Interpretation of Scalar and Array Assignment 119
10.2 Masked Array Assignment: WHERE 121
10.2.1 WHERE Statement 121
10.2.2 WHERE Construct 122
10.2.3 Interpretation of Masked Array Assignments 123
10.2.4 Nested WHERE Constructs 125
10.3 FORALL Elemental Array Assignment 127
10.3.1 Examples of FORALL Statements 131

Chapter 11 Execution Control 133

11.1 Blocks of Executable Statements 133
11.1.1 Rules Governing Blocks 134
11.2 Logical IF Statement 135
11.3 Block IF Construct 135
11.4 CASE Construct 137
11.5 Loop Constructs 140
11.5.1 Block Loop Constructs 140
11.5.2 Nonblock Loop Constructs 144
11.5.3 EXIT Statement 147
11.5.4 CYCLE Statement 148
11.5.5 Execution of Loop Constructs 149
11.5.6 Examples of Loop Constructs 152

Version 2.2, October 1994
Copyright © 1989–1994 Thinking Machines Corporation

11.6 Branching Statements 154
11.6.1 GO TO Statement 155
11.6.2 Computed GO TO Statement 155
11.6.3 ASSIGN and Assigned GO TO Statement 156
11.6.4 Arithmetic IF Statement 158
11.7 CONTINUE Statement 159
11.8 STOP Statement 159
11.9 PAUSE Statement 159

Chapter 12 Procedures: Subroutines and Functions 161

12.1 Subroutines: SUBROUTINE Statements 162
12.2 Function Subprograms: FUNCTION Statements 163
12.2.1 Array-Valued Function Subprograms 164
12.3 Statement Functions 165
12.4 ENTRY Statement 166
12.5 Procedure Reference 168
12.5.1 Subroutine Reference: CALL Statement 169
12.5.2 Function Reference 170
12.6 Procedure Interfaces 174
12.6.1 Interface Blocks 175
12.6.2 Implicit and Explicit Interfaces 177
12.6.3 Argument Association 178
12.6.4 Sequence Association of Arguments 182
12.7 EXTERNAL Statement 184
12.8 INTRINSIC Statement 184
12.9 RETURN Statement 185
12.10 External Procedures Defined by Other Means 186

Chapter 13 File Input/Output 189

13.1 External Files 189
13.1.1 Sequential Access to External Files 190
13.1.2 Direct Access to External Files 191
13.1.3 Position of External Files 191
13.2 Internal Files 193
13.3 Record Formats 194
13.3.1 Formatted Records 194
13.3.2 Unformatted Records 194

Copyright © 1989–1994 Thinking Machines Corporation

13.3.3 Endfile Records 195
13.4 Form of the File I/O Statements 195
13.4.1 Input/Output Control Specification List 196
13.4.2 Input/Output List 203
13.5 Sequential Data Transfer — External Files 205
13.5.1 Formatted Sequential READ (External Files) 205
13.5.2 Formatted Sequential WRITE and PRINT (External Files) . . . 207
13.5.3 Unformatted Sequential READ (External Files) 210
13.5.4 Unformatted Sequential WRITE (External Files) 211
13.5.5 List-Directed READ (External Files) 213
13.5.6 List-Directed WRITE and PRINT (External Files) 215
13.6 Sequential Data Transfer — Internal Files 217
13.6.1 Formatted Sequential READ (Internal Files) 217
13.6.2 Formatted Sequential WRITE (Internal Files) 219
13.6.3 List-Directed READ (Internal Files) 221
13.6.4 List-Directed WRITE (Internal Files) 222
13.7 Direct Access Data Transfer — External Files 224
13.7.1 Formatted Direct Access READ (External Files) 225
13.7.2 Formatted Direct Access WRITE (External Files) 227
13.7.3 Unformatted Direct Access READ (External Files) 229
13.7.4 Unformatted Direct Access WRITE (External Files) 230
13.8 Error and End-of-File Conditions 232

Chapter 14 Auxiliary Input/Output 235

14.1 Connection of a Unit to an External File 235
14.2 OPEN Statement 236
14.2.1 FILE= Specifier in the OPEN Statement 237
14.2.2 STATUS= Specifier in the OPEN Statement 238
14.2.3 ACCESS= Specifier in the OPEN Statement 238
14.2.4 FORM= Specifier in the OPEN Statement 239
14.2.5 RECL= Specifier in the OPEN Statement 239
14.2.6 BLANK= Specifier in the OPEN Statement 240
14.2.7 READONLY Specifier in the OPEN Statement 240
14.2.8 POSITION= Specifier in the OPEN Statement 241
14.2.9 ACTION= Specifier in the OPEN Statement 241
14.2.10 DELIM= Specifier in the OPEN Statement 242
14.2.11 PAD= Specifier in the OPEN Statement 242
14.3 CLOSE Statement 242
14.3.1 STATUS= Specifier in the CLOSE Statement 243

Version 2.2, October 1994
Copyright © 1989–1994 Thinking Machines Corporation

14.3.2 Implicit CLOSE at Program Termination 244
14.4 File Positioning Statements 244
14.4.1 BACKSPACE Statement 245
14.4.2 ENDFILE Statement 245
14.4.3 REWIND Statement 246
14.5 File Inquiry: INQUIRE Statement 246
14.5.1 UNIT= Specifier in the INQUIRE Statement 248
14.5.2 FILE= Specifier in the INQUIRE Statement 248
14.5.3 EXIST= Specifier in the INQUIRE Statement 249
14.5.4 OPENED= Specifier in the INQUIRE Statement 249
14.5.5 NUMBER= Specifier in the INQUIRE Statement 249
14.5.6 NAMED= Specifier in the INQUIRE Statement 250
14.5.7 NAME= Specifier in the INQUIRE Statement 250
14.5.8 ACCESS= Specifier in the INQUIRE Statement 250
14.5.9 SEQUENTIAL= Specifier in the INQUIRE Statement 250
14.5.10 DIRECT= Specifier in the INQUIRE Statement 251
14.5.11 FORM= Specifier in the INQUIRE Statement 251
14.5.12 FORMATTED= Specifier in the INQUIRE Statement 251
14.5.13 UNFORMATTED= Specifier in the INQUIRE Statement 252
14.5.14 RECL= Specifier in the INQUIRE Statement 252
14.5.15 NEXTREC= Specifier in the INQUIRE Statement 252
14.5.16 BLANK= Specifier in the INQUIRE Statement 253
14.5.17 ERR= Specifier in the INQUIRE Statement 253
14.5.18 IOSTAT= Specifier in the INQUIRE Statement 253
14.5.19 POSITION= Specifier in the INQUIRE Statement 253
14.5.20 ACTION= Specifier in the INQUIRE Statement 254
14.5.21 DELIM= Specifier in the INQUIRE Statement 254
14.5.22 PAD= Specifier in the INQUIRE Statement 254

Chapter 15 Input/Output Editing 257

15.1 Format Specification 257
15.1.1 FORMAT Statement 258
15.1.2 Character String Format Specification 259
15.2 Data Edit Descriptors 260
15.2.1 Numeric Editing 261
15.2.2 Logical Editing (L Editing) 271
15.2.3 Character Editing (A Editing) 273
15.3 Control Edit Descriptors 274
15.3.1 Position Editing 275
15.3.2 Slash Editing 277

Copyright © 1989–1994 Thinking Machines Corporation

15.3.3 Colon Editing 278
15.3.4 Dollar Editing 278
15.3.5 S, SP, and SS Editing 279
15.3.6 P Editing and the Scale Factor 280
15.3.7 BN and BZ Editing 282
15.4 Character Literal Edit Descriptors 283
15.4.1 Character Literal Constants (Apostrophe Editing) 284
15.4.2 Hollerith Constants (H Editing) 284
15.5 Interaction between I/O List and Format Specification 286
15.5.1 Format Control Reversion 286
15.6 List-Directed Formatting 287
15.6.1 List-Directed Input 288
15.6.2 List-Directed Output 291
15.7 Namelist Editing 293
15.7.1 Namelist Input 294
15.7.2 Namelist Output 295

Chapter 16 Scope of Names and Entities 297

16.1 Scoping Units and Scope 297
16.2 Scope of Names 298
16.2.1 Common Block Names 299
16.2.2 Function Result Variables 299
16.2.3 Argument Keywords 299
16.2.4 Statement Entities 299
16.3 Scope of Other Entities 300
16.4 Events That Change the Value of Variables 300
16.5 Use of Whole Array Names 303

Chapter 17 Intrinsic Functions 305

17.1 Numeric Functions 306
17.2 Mathematical Functions 307
17.3 Character Functions 308
17.4 Kind Functions 308
17.5 Numeric Inquiry Functions 309
17.6 Bit-Level Functions 309
17.7 Floating-Point Manipulation Functions 310
17.8 Vector and Matrix Multiplication Functions 310

Version 2.2, October 1994
Copyright © 1989–1994 Thinking Machines Corporation

17.9 Array Reduction Functions 310
17.10 Array Inquiry Functions 311
17.11 Array Construction Functions 311
17.12 Array Manipulation Functions 312
17.13 Array Location Functions 312
17.14 Subroutines 313
17.15 Models for Integer and Real Data 313
17.16 Specific Names for Generic Intrinsic Functions 314
17.17 Specifications of the Intrinsic Functions 317

Chapter 18 Array Homes and Argument Passing 489

18.1 Determination of the Processor Home of an Array 489
18.1.1 Array Home Rules for Local Arrays 490
18.1.2 Array Home Rules for Arrays in Common 491
18.1.3 Examples Illustrating Array Homes 494
18.2 Array Argument Passing 496
18.3 Arrays in Common 502

Appendix

Appendix A Compiler Directives 505

A.1 Form and Placement of Directives 505
A.2 Directives That Control Array Layout 506
A.2.1 Geometries 507
A.2.2 Canonical Layout of Arrays 508
A.2.3 Serial Ordering and Axis Locality 509
A.2.4 The `LAYOUT` Directive (Nondetailed) 511
A.2.5 The `LAYOUT` Directive (Detailed) 516
A.2.6 The `ALIGN` Directive 518
A.3 The `COMMON` Directive 527
