About This Manual

Objectives of This Manual

This manual provides reference and usage information about the procedures in the CM Fortran utility library, global/local library, and cmf77 library.

Intended Audience

This manual assumes familiarity with CM Fortran programming.

Organization of This Manual

Part I CM Fortran Utility Library

Describes the utility procedures by functional categories and suggests how to use them. The descriptions include comparisons with language features, where appropriate, as well as reference pages for each of the procedures.

Part II Global/Local Programming

Describes global/local programming and provides reference pages for the library procedures.

Part III cmf77 Library

Describes the library **`libcmf77.a`** and compares it with Sun Microsystems' **`libF77.a`**.

Revision Information

This manual supersedes the *CM Fortran Libraries Reference Manual*, Version 2.1.
