Chapter 1 Introduction to CMSSL for C* **1**

1.1 About CMSSL 1
1.2 Contents of CMSSL for C* 2
1.2.1 Library Routines 2
1.2.2 Safety Mechanism 11
1.3 Notes on Terminology and Conventions 11
1.3.1 Parallel Variable Axis Descriptions 11
1.3.2 Zero-Based Coordinates 12
1.3.3 Processing Elements and Subgrids 12
1.3.4 Pointer Names Used for Variables 13
1.4 Data Types Supported 13
1.5 Support for Multiple Instances 15
1.5.1 Defining Multiple Independent Data Sets 16
1.5.2 Notation Used for Parallel Variables and Embedded Matrices . . . 17
1.5.3 Rules for Data Axes and Instance Axes 17
1.5.4 Specifying Single-Instance vs. Multiple-Instance Operations 18
1.6 Numerical Stability for the Linear Algebra Routines 19
1.7 Numerical Complexity 20

Chapter 2 Using the C* CMSSL Interface **25**

2.1 Creating a C* CMSSL Program 25
2.1.1 Including the CMSSL Header File 26
2.1.2 Calling CMSSL Routines 27
2.1.3 Compiling and Linking 27
2.1.4 Executing CMSSL Programs 28
2.2 Restrictions and Performance Guidelines 28

2.2.1 CMSSL Expects Only Certain Numeric Data Types 29
2.2.2 CMSSL Expects Parallel Arguments to Be Passed by Reference 29
2.2.3 CMSSL Expects One Data Element per Position 30
2.2.4 CMSSL Prefers Doubleword-Aligned Arguments 31
2.2.5 CMSSL Prefers Contiguous Data Elements 32
2.2.6 Summary of Restrictions 33
2.2.7 Summary of Performance Guidelines 34
2.2.8 More on Performance Costs 34
2.3 Complex Data Types and Macros 35
2.4 The CMSSL Safety Mechanism 36
2.4.1 Safety Mechanism Features 36
2.4.2 Levels of Error Checking 38
2.4.3 Setting the CMSSL Safety Environment Variable 39
2.4.4 Using CMSSL Safety from within a Program 39
2.5 On-Line Sample Code and Man Pages 40

Chapter 3 Dense Matrix Operations 41

3.1 Inner Product 42
Man page for Inner Product 44
3.2 2-Norm 51
Man page for 2-Norm 52
3.3 Outer Product 55
Man page for Outer Product 56
3.4 Matrix Vector Multiplication 60
Man page for Matrix Vector Multiplication 61
3.5 Vector Matrix Multiplication 65
Man page for Vector Matrix Multiplication 66
3.6 Infinity Norm 70
Man page for Infinity Norm 71
3.7 Matrix Multiplication 74
Man page for Matrix Multiplication 76
3.8 References 83

Chapter 4 Fast Fourier Transforms 85

4.1 Introduction 86
4.1.1 The CMSSL FFT Library Calls 87

4.2 Complex-to-Complex FFT 89
4.2.1 Butterfly Computations, Twiddle Factors, and the CCFFT Setup Phase 89
4.2.2 Bit Ordering and Bit Reversal 89
4.2.3 Multidimensional and Multiple-Instance FFTs 91
4.2.4 Current Restrictions 92
4.2.5 Implementation and Performance 92
4.2.6 Efficient Computation of Convolutions and Correlations 96

Man page for Complex-to-Complex Fast Fourier Transform 98

4.3 Real-to-Complex and Complex-to-Real FFTs 106
4.3.1 Relationship of CRFFT, RCFFT, and CCFFT 107
4.3.2 Data Orderings 107
4.3.3 Multidimensional and Multiple-Instance Real-to-Complex and Complex-to-Real FFTs 110
4.3.4 Implementation 112
4.3.5 Steps in Performing the Real-to-Complex and Complex-to-Real FFTs 116

Man page for Real-to-Complex and Complex-to-Real Fast Fourier Transform 118

4.4 Type Conversion Utilities for the Real-to-Complex and Complex-to-Real FFTs 128

Man page for Type Conversion Utilities for the Real-to-Complex and Complex-to-Real FFTs 129

4.5 References 134

Chapter 5 Random Number Generators 137

5.1 Introduction 137
5.1.1 The Fast RNG and the VP RNG Compared 138
5.1.2 The RNG Routines 138
5.1.3 Implementation 139

5.2 State Tables 140
5.2.1 Fast RNG State Tables 140
5.2.2 VP RNG State Tables 141
5.2.3 State Table Parameters 142
5.2.4 Need for Deallocation 143

5.2.5 Parameters Saved During Checkpointing 143
5.3 Alternate-Stream Checkpointing 144
5.4 References 147
Man page for Fast RNG 148
Man page for VP RNG 155

Chapter 6 Communication Primitives **163**
6.1 Overview 163
6.2 Matrix Transpose 164
6.2.1 Example 164
Man page for Matrix Transpose 165
6.3 Sparse Gather Utility 167
6.3.1 The Gather Utility Routines 167
6.3.2 Definition of the Gather Operation 167
6.3.3 Gather Operation Examples 168
Man page for Sparse Gather Utility 171
6.4 Sparse Scatter Utility 175
6.4.1 The Scatter Utility Routines 175
6.4.2 Definition of the Scatter Operation 175
6.4.3 Scatter Operation Example 176
Man page for Sparse Scatter Utility 178
6.5 Sparse Vector Gather Utility 182
6.5.1 Definition of the Vector Gather Operation 182
6.5.2 Examples 182
Man page for Sparse Vector Gather Utility 185
6.6 Sparse Vector Scatter Utility 190
6.6.1 Definition of the Vector Scatter Operation 190
6.6.2 Example 190
Man page for Sparse Vector Scatter Utility 192
6.7 Block Gather and Scatter Utilities 196
Man page for Block Gather and Scatter Utilities 199
6.8 Partitioning of an Unstructured Mesh
and Reordering of Mappings 204
6.8.1 Definitions 205
6.8.2 Finite Element Numbering Scheme 207
6.8.3 Partitioning Rules 208

Copyright © 1993 Thinking Machines Corporation

6.8.4 The Partitioning Permutation 212
6.8.5 Reordering a Mapping 213
6.8.6 Renumbering Mappings 214
Man page for Partitioning of an Unstructured Mesh and Reordering of Mappings 215
6.9 Partitioned Gather Utility 224
Man page for Partitioned Gather Utility 225
6.10 Partitioned Scatter Utility 231
Man page for Partitioned Scatter Utility 232
6.11 Vector Move (Extract and Deposit) 238
Man page for Vector Move (Extract and Deposit) 239
6.12 References 243
