Abstract . . . 1

Overture 2

1 Introduction . . . 3
1.1 Statistical Relational Learning . . . 3
1.2 Our Approach: The ILP Perspective . . . 6
1.3 Contributions and Outline of the Thesis . . . 7
1.4 Citations to Previously Published Work . . . 9

2 Probabilistic Inductive Logic Programming . . . 11
2.1 Logic Programming Concepts . . . 11
2.2 Inductive Logic Programming (ILP) and its Settings . . . 14
2.3 Probabilistic ILP Settings . . . 21
2.4 Probabilistic ILP: A Definition and Example Algorithms . . . 27
2.5 Conclusions . . . 33

Part I: Probabilistic ILP over Interpretations 35

3 Bayesian Logic Programs . . . 37
3.1 The Propositional Case: Bayesian Networks . . . 38
3.2 The First-Order Case . . . 39
3.3 Extensions of the Basic Framework . . . 47

4 Learning Bayesian Logic Programs . . . 54
4.1 The Learning Setting: Probabilistic Learning from Interpretations . . . 54
4.2 Scooby – Structural learning of intensional Bayesian logic programs . . . 57
4.3 Parameter Estimation . . . 63
4.4 Experimental Evaluation . . . 73

Balios – The Engine for Bayesian Logic Programs . . . 77

Future Work . . . 78

Conclusions . . . 79

Related Work . . . 80

Part II: Probabilistic ILP over Time 89

5 Logical Hidden Markov Models . . . 91
5.1 Representation Language . . . 92
5.2 Semantics . . . 96
5.3 Design Choices . . . 98

6 Three Basic Inference Problems for Logical HMMs 100
6.1 Evaluation 102
6.2 Most Likely State Sequences 103
6.3 Parameter Estimation 104
6.4 Advantages of Logical Hidden Markov Models 106
6.5 Real World Applications 109

7 Learning the Structure of Logical HMMs 116
7.1 The Learning Setting: Probabilistic Learning from Proofs 117
7.2 A Naïve Learning Algorithm 118
7.3 sagEM: A Structural Generalized EM 121
7.4 Experimental Evaluation 124

Future Work 126

Conclusions 128

Related Work 128

Intermezzo: Exploiting Probabilistic ILP in Discriminative Classifiers 133

8 Relational Fisher Kernels 135
8.1 Kernel Methods and Probabilistic Models 136
8.2 Fisher Kernels for Interpretations and Logical Sequences 137
8.3 Experimental Evaluation 140
8.4 Future Work and Conclusions 146
8.5 Related Work 147

Part III: Making Complex Decisions in Relational Domains 149

9 Markov Decision Programs 151
9.1 Markov Decision Processes 152
9.2 Representation Language 155
9.3 Semantics 158

10 Solving Markov Decision Programs 159
10.1 Abstract Policies 160
10.2 Generalized Relational Policy Iteration 162
10.3 Model-free Relational TD(λ) 164
10.4 Model-based Relational Value Iteration based on ReBel 170

Future Work 180

Conclusions 181

Related Work 182

Finale 185

11 Summary 187

12 Conclusions 188

13 Future Work 189

Appendix

A Models for Unix Command and mRNA Sequences 197
A.1 Logical HMM for Unix Command Sequences 197
A.2 Tree-based logical HMM for mRNA Sequences 198
