CTSS BULLETIN #4

The following CTSS Library modifications will become effective on December 31, 1963:

1)   (SPH) is now a separate routine, with only WRFLX and (IØH) in the transfer vector.

2)   The error in (STH) involving index register 6 has been corrected.

The modular version of CTSS will be used starting December 31, 1963. This version of CTSS uses the drums, which will improve service. Other modifications, to be put into effect soon, will further improve service.
