Identification

TD_INPUT
D. L. Stone

(Note that the following is an Abstract, which should
be replaced by a full description at a later time.)

Function of Entry:

td_input: - to read a disc editor format tape and
           put the contents in the specified Multics
           directories.

$one_file: - perform same function, but for a single
             7 punch file.

Calling Sequence for Entry:

call td_input;

call td_input$one_file(dir, name1, name2);

Declaration of Arguments:

dcl dir char(*),   /* directory in which to put file */

    (name1,   /* CTSS names for segment */

    name2) char(6);

Description of Arguments:
