CTSS BULLETIN #33

New Command: REMARK

The purpose of this command is to facilitate the recording of user's remarks into a common file.

Format: REMARK ALFA BETA

where ALFA BETA is the name of the BCD file which contains the user's comments. ALFA BETA is appended to a global file called USER REMARK, and kept in the public file pool.

If BETA is omitted it is assumed BCD.

If ALFA and BETA are omitted instructions for using the command are printed. REMARK calls CHNCOM.

Starting June 16th, the previous method of recording remarks will be discontinued.
