## CTSS BULLETIN #45

The version of the BSS loader described in memo MAC-M-169 is available as CTEST3. To use this loader, the user types CTEST3 in front of the commands described in memo 169. For example,

CTEST3 LOAD (CFL1) ALPHA

instead of

LOAD (CFL1) ALPHA.

When LOAD is used with CTEST3, the program is loaded beginning at 7000 (octal) instead of 6500, as stated in memo 169.
