

November 9, 1964
(Supersedes November 4, 1964)

CTSS BULLETIN #62

I. CTEST commands for the new versions of RUNCOM, COMBIN, and SPLIT

The CTEST commands are now:

CTEST1	new RUNCOM	(CTSS Bulletin No. 54)
CTEST2	AED	
CTEST3	ESL Loader	
CTEST4	LOAD - Large Movie Table	
CTEST5	SYMTAB from MADTAB	
CTEST6	new COMBIN	(CTSS Bulletin No. 58)
CTEST7	new SPLIT	(CTSS Bulletin No. 52)
CTEST8	MAD	(CTSS Bulletin No. 55)
CTEST9	E-SAMUEL's EDIT	

The version of SNOBOL which was CTEST7 is now available in the public file as SNOBL1 SAVED.

II. SNOBOL

A new version of SNOBOL is available as the SNOBOL command. It is roughly that which was described by Messrs. Farber, Griswold, and Polansky at a Spring MAC lecture. It is not entirely checked out. A new edition of CC Memo 235 will be published to describe the new version including the changes in syntax, input-output and CTSS peculiarities.
