## Identification

τ

td\_readbcd T. P. Skinner

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

Function of Entry:

This routine will read one <u>bcd</u> record by calling the tape dcm in the tape daemon. It then converts the bcd data into Standard Multics ASCII.

Calling Sequence for Entry:

call td\_readbcd(ioname, p, n, error);

Declaration of Arguments:

dcl ioname char(32),
p ptr
n fixed bin(17),
error fixed;

Description of Arguments:
