Identification

td\_write27  
T. P. Skinner

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

## Function of Entry:

To write 27 word binary records for the merge\_editor. It formats the data to binary record format (7-9 punch and word count) and the writes by calling the tape dcm. Entry one writes only one record and without formatting.

## Calling Sequence for Entry:

```
call td_write27 (ioname, p, n, error);  
call td_write27$one (ioname, p, n, error);
```

## Declaration of Arguments:

```
dc1 ioname char(32),  
    p ptr,  
    (n,  
    error) fixed bin(17);
```

## Description of Arguments:

ioname - name of tape drive.  
p - ptr to data to be written.  
n - words to be written.  
error - 0 (no error)  
 2 (tape error)
