<u>Identification</u>

td_write27
T. P. Skinner

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

Function of Entry:

To write 27 word binary records for the merge_editor. It formats the data to binary record format (7-9 punch and word count) and the writes by calling the tape dcm. Entry one writes only one record and without formatting.

Calling Sequence for Entry:

ca 1 td_write27 (ioname, p, n, error);
ca 1 td_write27\$one (ioname, p, n, error);

Declaration of Arguments:

dc% ioname char(32),
 p ptr,
 (n,
 error) fixed bin(17);

Description of Arguments:

ioname - name of tape drive.

p - ptr to data to be written.

n - words to be written.

error - 0 (no error)

2 (tape error)
