Identification

ctss_aarchv
D. L. Stone

(Note that the following is an Abstract, which should
be replaced by a full description at a later time.)

Function of Entry:

To convert a single ascii file which has CTSS ascii
aarchv command format into a collection of files
each of which is one of the components of the
original. The names of the components are the
concatenation of the ctss names with a "." inserted.
They are put in the working directory. (CTSS makes
these names upper case; ctss_aarchv uses whatever
case is in the file.)

Calling Sequence for Entry:

    call ctss_aarchv (file_name);

Declaration of Arguments:

    dcl file_name char(*) varying;

Description of Arguments:
