Mr. R. E. Hoffman
Honeywell Information Systems, Inc.
275 Wyman Street
Waltham, Massachusetts 02154

Dear Bob: Re: ARPA Connection to Multics

Please quote price and delivery of an Asynchronous Bit Serial Inter-
face for connection between our ARPANET IMP and a Honeywell Series
6000 common peripheral channel.

This interface was originally designed and built by Rick Gumpertz of
Project MAC and submitted to Honeywell Engineering for design review.

Earliest possible delivery is requested and both rental, purchase and
maintenance prices are needed.

Sincerely yours,

Weston J. Burner
Director
