Mr. Henry Nye
Honeywell Information Systems Inc.
575 Technology Square
Third Floor
Cambridge, Massachusetts 02139

Dear Henry:

Please remove at your earliest convenience, after November 15, the currently installed DSU 10 subsystem attached to the Multics Development Machine. Since this is the last file on the system, the controller, file electronics, air compressor and all other related hardware are involved.

Please let us know as soon as you have a shipping date so we can arrange for riggers and the physical removal.

Weston J. Burner, Director
Information Processing Center

WJB/prm

cc: Multics Administrative Distribution
IPC Section Managers
Mr. G. Kleinow
