From: J. H. Saltzer  
Date: May 4, 1973  
Subject: ARPA network usage of the 645 service

In the month of April, network logins numbered 1020, out of a total of 8901, or 11%. Some 28 hours of cpu time were logged, mostly on first shift, thereby accounting for an estimated 13K of revenue, again about 11%. These figures indicate a growing importance of the network attachment.
