Subject: Data Sets - 113A

Thank you for providing me with a copy of Ken Pogran's paper on the problems we are experiencing with the 113A.

As you know, I was aware of Ken's efforts. His recommendations on modification of the 113A were incorporated in a request to New England Telephone Co. on March 29th to provide M.I.T. with a "special assembly" of the 113A, utilizing Ken's suggestion. As yet, I have not received a response from NET.
