MASSACHUSETTS INSTITUTE OF TECHNOLOGY CAMBRIDGE, MASS. 02139

from the office of

Telecommunications

September 21, 1970

To: W. Burner

Subject: M.I.T. Data Switch

For your information, the following additions have been made or will be made on the M.I.T. data switch:

- Increase "818"/"63" from 5 to 8 - completed
- Increase trunks and regrade "8" - to be done 9/24/70 (8 AM-11 AM)
- Regrade "5" - to be done by 9/25/70

You mentioned that Brown University leases a 40.8 kbs circuit from N.E.T., but provides its own data sets. This is incorrect. The circuit is an in-house facility, which goes between 2 rooms that are near one another. N.E.T. does not provide the facility.
