May 26, 1970

To: W. Burner

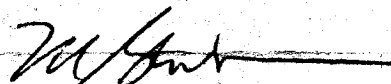

Subject: Expansion of the Data Switch

Reference: Your Memo of May 19, 1970

In line with our discussion of May 21st concerning the sale of the GE Computer operations to Honeywell and the uncertainties it generates, I have put a hold on the request outlined in your memo until I hear further from you.

For your information, a third 103E data station or cabinet is needed when the number of trunks on "8" are increased from 48 to 64. At the present time there are 2 - 103E stations at T.S. One cabinet has all 40 data sets in use, and the other has 36 in use. The order for a third 103E is also held-up in line with the above.

Please advise.
