Subject: M.I.T. Data Switch

*File*

If you recall, the M.I.T. data switch will be restructured in June. The new structure will be:

- |      |             |                              |
|------|-------------|------------------------------|
| 11xx | } Terminals | 61 - BTL                     |
| 12xx |             | 62 - Lincoln Lab Data Switch |
| 13xx |             | 63 - M.I.T.                  |
| 14xx |             | 7 - GE 645                   |
| 15xx |             | 8 - GE 645                   |
| 16xx |             | 9 - IBM 7094                 |
| 2    | } Vacant    | 0 - IBM 7094                 |
| 3    |             |                              |
| 4    |             | 4 - Reserved for IBM 360/65  |
| 5    |             | 5 - Reserved for IBM 360/67  |

It will take NET a Saturday and a Sunday to switch over from the present system configuration to the above. Would the weekend of June 13-14 be satisfactory with you? If not, when?
