2 processor service: (1 front machine)

60 ⟷ 120 users
40 ⟷ 80 MIT
20 ⟷ 40 GE

assume

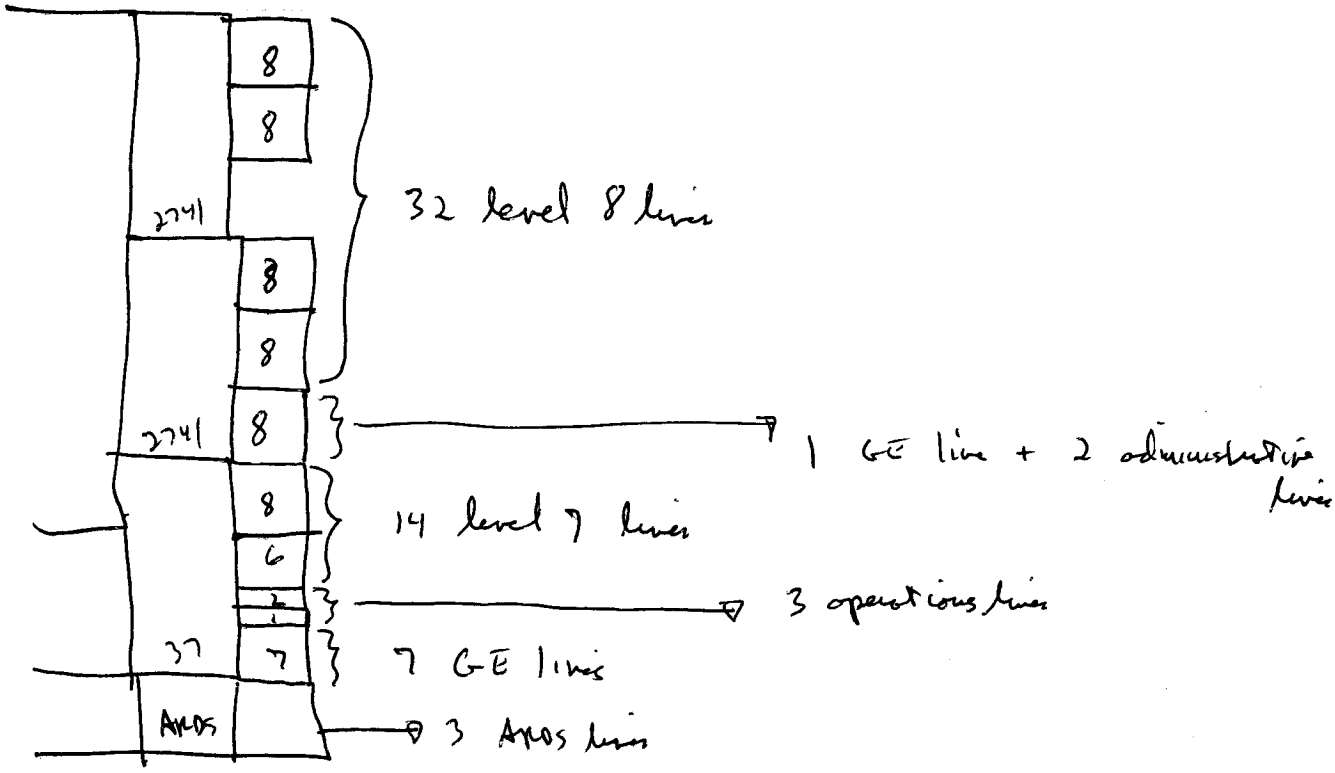
30 + 20 = 50
~~20 + 40 = 60~~
~~30~~ 15 + 10 = 25
75

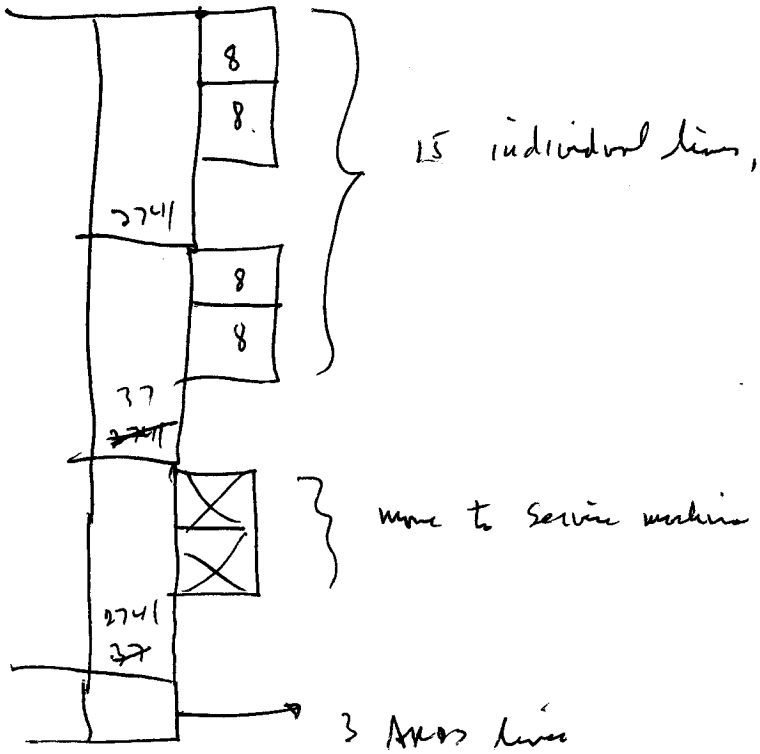
25 GE users
require ~~30~~ 20 M37 ports (TN300?)
16 M35 ports

50 MIT Users
require
40 1050 ports · 2 } operations
2 M37 ports 2 } + admin.
6 ARDS.

38 on 8 level
22 on 7 level
4 on single digits for operations/admin. } 70
6 on hunt for ARDS

+ 10 lines approx for test use of 2nd GIOC. } 80





Spare ports:
5 on Serv.
17 on dev.
22 total

2 processor service, 2 30 user workings

Sys 1 for MIT only (+ MAC)

30 up to 40 users assume 20+20 = 40 users

Req	32	1050 ports on level 8
	14	1337 ports on level 9
	6	ARDS ports on level
	4	operations ports on single digits
	56	

Sys 2 MAC (background group) + GE dev + use.

MIT has 1/3 = 10 users, all heavy.

Req 10 1050 ports on level (23)
