SUBJECT: Relocation of teletypes

Relocate teletypes (#401 x341, #407 x273, #410 x433 + #412 x445) from the GE-645 area to the old 7094 area.

The new location will be approximately 3 feet in front (towards POLAROID building) of post in which the FOXBORO recorder is mounted.

The teletypes will be moved on 10/11/69 and if work can be done prior to this date I would like them double tapped.

Any questions call x5945
