III. PLANNING FOR THE REST OF PROJECT MAC

(This section is almost totally incomplete. The following questions are
some which could be answered in this section:

1. What are the projects

2. What is the hardware support planned for them--what machine and how much.

3. What are the individual budgets and the hardware]development/staff breakdowns
of each.

4. To what extent to these projects use j CTSS
                                    Multics
                                    IPSC machines (360]67, 360/65)
                                    other machines

5. Plan for absorbing the budget released by the Computer System Research jgroup.

6. Is there any plan to couple task II equipment with task I work.
