November 30, 1973

Mr. William Annand
Graphic Arts, Offset Office
Building N42

Dear Mr. Annand:

Enclosed are the originals for photo direct offset reproduction of 400 copies of Revision 15 of Part II of the Multics Programmers' Manual, which consists of 455 printed sides. A requisition, number 73668-12 on account number 13598.448, from the Information Processing Center, should arrive under separate cover including delivery instructions.

The manual consists of 85 separately page-numbered sections, each of which is to start on a new page and be printed on both sides. Note that the last page of each section has the word "END" printed in its bottom margin. In addition, the originals for each section are fastened together with a paper clip. The object is to produce a complete 455-page, 3-hole punched package, stapled or tied with string, depending on the size of the package.

When finished, please return the proof and originals to Mrs. D. Jones in room 503, 545 Technology Square, and the 400 copies to the address indicated on the requisition.

If you have any further questions, please call Mrs. D. Jones on extension 3-6011.

Sincerely yours,

Karolyn Martin
