Honeywell

TO: List of Attendees   cc: List

SUBJECT: FORUM MEETING FOR FEBRUARY 9, 1977

ATTENDEES: R. J. Chevalier   R. A. Roach   J. R. Steinberg
            P. B. Kelley   L. J. Ryan
            M. A. Parkes   S. D. Sprague

HARDWARE - S. D. Sprague

Memory C

- Parity errors caused 2 crashes.
  FED located and swapped failing word mother board yesterday.

CPU-A&B

- Crashes related to trouble faults.
  FED swapped boards on Tuesday and is monitoring this problem.
  Some possibility that these trouble faults were caused by
  environmental temperature problems.

Bulk Store

- Board failed in CSM#5 causing crash.
  FED located problem and replaced failing board. This was
  the first BS failure over a long period of time.

Printer

- Frequent paper jams occurring.
  FED has ordered parts to replace the stacker tension bar.

SOFTWARE - P. B. Kelley

- System 30.5A installed.
- New PL1 Compiler scheduled for installation.
- Fortran I/O compatability problems have been corrected by
  CISL.

OTHER

. Parking is extremely difficult for FED during normal
working hours. Campus police are refusing to allow
Honeywell Reps into the Visitor Parking Lot on
Albany Street. Leo says he will investigate to see if
provisions for parking can be made.
