SUBJECT: FORUM MEETING FOR FEBRUARY 23, 1977

ATTENDEES: R. Chevalier R. A. Roach G. Williams
R. Moore S. D. Sprague
M. A. Parkes J. R. Steinberg

HARDWARE - S. D. Sprague

DSU190

- . Major head crash on Unit 1. Both pack and all heads destroyed. FED working on unit and Chevalier will get replacement pack.

Processors

- . 7 crashes caused by apparently different reasons in CPU-A. FED working close with CISL and Phoenix in an attempt to analyze problems. Board swap between processors is likely.

Printer

- . Paper jams. FED replaced stacker tension unit and will now adjust tractors.

SOFTWARE - G. Williams

- . System 30.6 installed.
- . New PL/1 compiler to be installed on Thursday.
- . One unexplained system hang.
Bernie Greenberg is reviewing dump.
