TO: List of Attendees   cc: List

SUBJECT: FORUM MEETING FOR MARCH 9, 1977

ATTENDEES: R. J. Chevalier   S. D. Sprague
            P. B. Kelley   J. R. Steinberg
            R. A. Roach

HARDWARE - S. D. Sprague

Processors

- CPU-A continues to fail and crash system. FED has swapped
  boards with CPU-B and now seems to have induced problems in
  that processor without removing the problem from CPU-B. To
  further complicate matters, FED ordered and received 2 boards
  from FED Supply which were not working when received.

Printer

- Tractors replaced again because of jams and paper was ripping.

OTHER

- Processor problems overshadowed other system problems.
  Chevalier will contact FED managers today and request a
  review of this system's performance and a meeting with
  J. R. Steinberg as soon as possible.

SOFTWARE - P. B. Kelley

- Attempts to terminate Initializer Process crashed system 4 times.
  Kelley thinks this could be a hardware problem.
