USC was based on present G7.
expanding

Upgrade G7 from 9mm → 15-20 mm.
by adding storage, drums for stripping.

Intended for 360 system development.
It is an ocean machine, not a throughput machine.

May combine 65 and 67 into a single installation

Plan

1. Draw up document of Technical Spec. & Structure.
2. Distribute copies of book with question to ask.

IPB

IPAC

Survey

should be done by subcommittee of IPAC

There is precedent for marketing to parts of outside service
IPB-Orencia at idea of GE/MIT both selling some machine.
