

7/14/68

Data Communications Working group.

1. Harvard computers can accept RPA and 2741's
This means that they will not object to 2741
being one standard for CAM use.
2. Harvard people want 33125 compatibility on
or using MIT ~~to~~ computers or printers.
3. Recommendation: 2741 interface is recommended for
CAM/Harvard, required for direct connection to MIT
data center.
4. ARDS: Should CP/67 be upgraded to many
ARDS? ? Long range pricing effects on systems
supported by IBM.
There are three ARDS uses.
 1. Fast output
 2. Drawings output
 3. Ability to modify earlier displays.
