22nd September, 1971

Professor Jerome H. Saltzer
545 Tech Sq., Room 536

Dear Jerry,

During our telephone conversation yesterday morning, you indicated that you had never seen copies of the two most recent contractual actions relating to the GE—Honeywell relationship with MIT concerning Multics. I am enclosing copies of these two for you. The first, dated November 23, 1970, assigns to Honeywell all of the rights under agreement with General Electric with the exception of patent rights. The second, dated October 1, 1970 but, in fact, signed on May 5, 1971, makes transfer of patent rights.

Sincerely,

Robert H. Scott
Director

RHS/lm
Encs.
