Dear Dr. Westervelt:

Your name appears on the distribution list for periodic internal papers of the Multics project, under the mailing address above. I have picked up a rumor which suggests that you may have moved to Wayne State. If this rumor is correct, I would like to receive your instructions about the disposition of this stream of information. Since the stream was initiated to keep contact among ARPA contractees, it may be appropriate to suggest an alternative recipient at Michigan. On the other hand, if no one will look at the stuff, it would be preferable to discontinue sending it. In any case, I will not continue the stream until I hear from you.

Sincerely yours,

Dear Mr. Fredrickson:

Your name appears on the distribution list for periodic internal papers of the Multics project, under the mailing address above. I have picked up a rumor which suggests that you may have moved to Rand. If this rumor is correct, I would like to receive your instructions about the disposition of this stream of information. Since the stream was initiated to keep contact among ARPA contractees, it may be appropriate to suggest an alternative recipient at Stanford. On the other hand, if no one will look at the stuff, it would be preferable to discontinue sending it. In any case, I will not continue the stream until I hear from you.
