Mr. Henry Nye  
General Electric Company  
Large Systems Department  
Building 5 Court Street Plant  
Syracuse, New York 13201

Dear Mr. Nye:

Can you please supply me with a current status report on the GE DSU170 program. It is of particular interest to us in our 645 Multics planning and our decision process regarding the Datametrics controller and the IBM 2314.

Referencing my letter of November 26, 1969, it becomes most obvious that we must stay 170 compatible, and if for any reason a GE 170 controller could be made available in a similar time frame it would affect our decision.

Weston J. Burner  
Assistant to the Director
