B 8 = 0
B 8 = 1

↙ ↘
x 3.2.4

cannot be done by IBM 360 hardware. ←
(Edit comment)

"digit select" code badly chosen.

Some code for
printer ≠ digit code.

N.B. Cannot do decimal arithmetic
on unsigned numeric fields.

Might affect Merg type standard.

X.3.2.1 has already proposed B8 ⇒ on standard level
in Merg type standard.

DSP considered also.

Turner's own intention.

objection to IBM ~~to~~ proposal: Computer mapping needed.
(Can be gotten around.)
