

MPL-33

TO: Multics Performance Log
FROM: A. Sekino
SUBJECT: Corrections to MPL-25 and MPL-32
DATE: September 3, 1969

The statistics observed in performance measurement runs, MPM15, MPM16, and MPM22, should be replaced by the following. It was found that some numbers encountered in above runs exceeded the acceptable range of a decimal-to-binary conversion routine of the Multics performance analysis program. Fortunately, this error occurred only in the above three runs out of the past twenty-four runs and so it will not distort the past observations.

Date	Run #	# of users	system	Total CPU time	Total # of P. F.	Total real time	Average CPU time	Average # of P. F.
7/31	MPM15	17	3.1.1	<u>72.560</u>	4003	2910	<u>1.099</u>	60
8/1	MPM16	17	3.1.1	<u>75.903</u>	4336	3210	<u>1.150</u>	65
8/13	MPM22	17	3.4	<u>70.916</u>	4036	3090	<u>1.074</u>	61

* All corrections are underlined.
