Identification

tape_daemon
D. L. Stone

(Note that the following is an Abstract, which should
be replaced by a full description at a later time.)

Function of Entry:

To initialize the tape system process and then to
dispatch on operator requests, tape interrupts
and inter-process signals.

Calling Sequence for Entry:

call tape_daemon (input_drive, output_drive);

Declaration of Arguments:

```
dcl (input_drive,                   /* logical unit for
                                       input */

     output_drive) char(1) varying; /* logical unit for
                                       output */
```

Description of Arguments:
