TO: MSPM Distribution

FROM: R.L. Rappaport

SUBJ: BJ.5.00 - BJ.5.05

DATE: April 3, 1967

The attached and accompanying sections, BJ.5.00 - BJ.5.05, represent a

major revision to the previously published documents on process switching.

In particular topics covered by the old BJ.5.01 have been separated into

three sections, BJ.5.00 - BJ.5.02. The information content of old BJ.5.01

has also been updated in that the descriptions of swap-dbr and ready-him

now describe steps taken by these routines to allow them to remain compa-

tible with the other modules in the process exchange.
