Identification

BOS snapshot restore
Shot
S. D. Dunten, T. H. Van Vleck

Purpose

SHOT restores a snapshot tape created by SNAP (BV.1.03)
containing machine conditions, drum, and core so that
an interrupted run may be restarted.

Usage

To reload a snapshot, mount the snaptape on some drive
n and issue the following BOS command:

    SHOT n

The snaptape will be read in and reloaded, and the run
immediately continued from where it was snapshotted.
