

Unbiased Warped-Area Sampling for Differentiable Rendering - Errata (ACM ToG 2020 Vol.39 pg 245:1 - 245:18)

October 20, 2022

1 Errata

This errata is to account for errors in the published version of the paper. The author version PDF on the project website has already been corrected.

1. **Eq. 6:** There should be no Jacobian symbol ($||$) in the denominator. The equation should instead read $\frac{\partial_{\theta}\mathbf{y}}{\partial_{\omega}\mathbf{y}}$. This equation also applies if one or more of the quantities are multi-dimensional. In that case, the numerator and denominator must be treated as matrices to arrive at the final expression.
