Image-Guided Adaptive Radiation Therapy: 
A MICCAI Workshop

September 14, 2014, Boston, MA, USA

This is an announcement of the workshop “Image-Guided Adaptive Radiation Therapy (IGART)”, which is to be held in conjunction with the “Medical Image Computing and Computer Assisted Interventions, MICCAI” Conference (miccai2014.org) in Boston, MA, USA.

We formally invite you to submit your work in the field of IGART. While the workshop aims at presenting leading edge applications of medical image processing in the field of radiotherapy, we also cordially invite early adopters from the clinical field to present initial results from novel clinical applications. The workshop will provide an invaluable opportunity to present and discuss recent and preliminary research in this exciting field, in addition to providing a good forum to get constructive feedback from fellow researchers on more developed pieces of work. The workshop will also feature tutorials and demos for research software toolkits and platforms available in the field.

To encourage the submission and open discussion of more recent work we will accept submissions ranging from extended abstract (2 pages) to full papers (8 pages).

For more information please see the workshop website: https://sites.google.com/site/igart2014/

If you should have any additional questions, please send an e-mail to: igart2014@gmail.com

**Deadlines:**
Submission: *June 13, 2014*
Notification of acceptance: *July 4, 2014*
Camera-ready papers: *July 28, 2014*
Early bird registration: *August 1, 2014* (note that the workshop may be cancelled if less than 20 attendees have registered at that time).

**Organizing committee:**
Wolfgang Birckfellner  
Center for Medical Physics and Biomedical Engineering, Medical University of Vienna, Austria and Christian-Doppler Laboratory for Medical Radiation Research for Radiation Oncology

Gregory C. Sharp  
Massachusetts General Hospital and Harvard Medical School

Christian Wachinger  
Massachusetts Institute of Technology, Computer Science and Artificial Intelligence Laboratory, Massachusetts General Hospital and Harvard Medical School

Csaba Pinter  
Laboratory for Percutaneous Surgery, School of Computing, Queen’s University, Canada
