## Post-Doc Position in Computational Neuroimaging

The Child and Adolescent Psychiatry at Ludwig Maximilian University (LMU) Munich is looking for a post-doctoral candidate in computational neuroimaging. The researcher will be involved in the development of new algorithms for the analysis of structural and functional magnetic resonance images. The focus will be on the analysis of large-scale neuroimaging datasets with machine learning techniques.

The applicant should have:

- A Ph.D. degree in medical image analysis, computational neuroimaging, machine learning or related field
- Strong mathematical and problem solving skills
- Strong programming skills
- Experience in neuroimaging is a plus

The Ludwig Maximilian University is ranked as the top university in Germany according to Times Higher Education World University Rankings. LMU Munich is an equal opportunity employer. Applications of women and disabled persons - given similar qualification - are preferred. Applicants with children are welcome.

Please send your CV, contact details of two academic references and a cover letter to [christian.wachinger@med.uni-muenchen.de](mailto:christian.wachinger@med.uni-muenchen.de).
