

Instructions:

- 1) Print (single-sided!)
- 2) Cut out sectors
- 3) For hats that sit on top of heads, make a cone out of one blank sector and one with words
- 4) For hats that are wider than a typical head (recommended), use two blank sectors

In the future, it might be a good idea to redraw these cones to have the tip be at the top center of the page instead of the top corner. This means a little more work when cutting out, but will result in the names and images being centered better.
