- Vehicle shown with available equipment.
- 2007 Manufacturer's Suggested Retail Price, excludes the Delivery, Processing and Handling Fee of \$580 for Cars and \$605 for Trucks, Vans and SUVs. (Historically, vehicle manufacturers and distributors have charged a separate fee for processing, handling and delivering vehicles to dealerships. Toyota's charge for these services is called the "Delivery, Processing and Handling Fee" and is based on the value of the processing, handling and delivery services Toyota provides as well as Toyota's overall pricing structure. Toyota may make a profit on the Delivery, Processing and Handling Fee.) Excludes taxes, license, title and available or regionally required equipment. The Delivery, Processing and Handling Fee in AL, AR, FL, GA, LA, MS, NC, OK, SC and TX is \$45 higher for Trucks, Sienna and SUVs, and \$55 higher for all other Toyota vehicles. Actual dealer price may vary. Pricing, specifications, standard features and available equipment are based on information available when this page was produced and are subject to change without notice.
- SE available with All-Season tires as a no-cost option.
- Performance tires are expected to experience greater tire wear than conventional tires. Tire life may be less than 24,000 miles, depending upon driving conditions.
- Automatic transmission only.
- V6 only.
- Fraichir™ is a trademark of Seiren Co., Ltd.
- 4-cylinder only.
- Standard on V6, available on 4-cylinder.
- Requires available leather-trimmed seats.
- Requires Comfort and Convenience Package and Leather Package.
- Plasmacluster™ is a trademark of Sharp Electronics, Inc.
- Satellite radio requires XM or Sirius compatibility, receiver and monthly service fee. See your Toyota dealer for further details. Reception of the satellite signal may vary depending on location. All fees and programming subject to change. Subscriptions subject to terms and conditions available at www.xmradio.com or www.sirius.com. Available only in the 48 contiguous United States.
- Toyota recommends the phones listed on its Web site at www.toyota.letstalk.com because they have been tested and meet our high standards for voice quality and functionality. This recommendation is not a warranty and some problems may occur with any type of phone based on the service coverage available in your area.
- The Toyota DVD navigation system is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Changes in street names, road closures, traffic flow or other road system changes may affect the accuracy of the mapping software. Rely upon your common sense to decide whether to follow a specified route. Detailed coverage not available in every city. Optional periodic geographical updates available at an additional cost. See your *Navigation System Owner's Manual* and your Toyota dealer for further details.

- Manual transmission only.
 - HomeLink® is a registered trademark of Johnson Controls, Inc.
 - The Toyota driver, front passenger, front seat-mounted side airbags, driver's knee airbag and side curtain airbags are Supplemental Restraint Systems (SRS). The driver and front passenger airbags and driver's knee airbag are designed to deploy in severe (usually frontal) collisions where the magnitude and duration of the forward deceleration of the vehicle exceed the design threshold level. The side airbags and side curtain airbags are designed to inflate in certain types of severe side-impact collisions. In all other accidents, the airbags will not inflate. To decrease the risk of injury from a deploying airbag, always wear seatbelts, sit upright in the middle of the seat as far back as possible from the airbag modules and do not lean against the door. Do not put objects in front of an airbag or around the seatback. Do not use rearward-facing child seats in any front passenger seat. The force of a deploying SRS airbag may cause serious injury or death. Please see your *Owner's Manual* for further instructions. Vehicle complies with "advanced airbag" requirements of FMVSS 208.
 - Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions.
 - Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details.
 - Toyota's Direct Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the Monitor. See your *Owner's Manual* for details.
 - Vehicle Dynamics Integrated Management (VDIM) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VDIM will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details.
- All information presented herein is based on data available at the time of posting, is subject to change without notice and pertains specifically to mainland U.S.A. vehicles only (may differ in the state of Hawaii, Puerto Rico, the U.S. Virgin Islands and in other regions).
