# Contents

About This Manual . . . . . xiii
Customer Support . . . . . xv

**Introduction** . . . . . **1**

**Chapter 1 Parallel Programming** . . . . . **5**

1.1 Parallel Programming on the CM-5 . . . . . 7

1.2 What Does CMMD Provide? . . . . . 8
1.2.1 The CMMD Library . . . . . 8
1.2.2 Communications Protocols . . . . . 10
1.2.3 CMMD I/O . . . . . 10

1.3 A Sample CMMD Program . . . . . 11

1.4 Compatibility with Other Software . . . . . 12
1.4.1 Header Files . . . . . 12

1.5 Using This Reference Manual . . . . . 12

**Chapter 2 CMMD Messages** . . . . . **13**

2.1 Message Passing Functions . . . . . 13
2.1.1 Send and Receive Functions . . . . . 14
2.1.2 Virtual Channels . . . . . 15
2.1.3 Active Messages . . . . . 15
2.1.4 Protocol-less Block Transfers: scopies and pcopies . . . . . 16

2.2 Programming Guidelines . . . . . 17

**Chapter 3 Programming Models and Execution Models** . . . . . **23**

3.1 CM-5 Architecture . . . . . 23

3.2 Programming Models . . . . . 24
3.2.1 Global Data Parallel Programs . . . . . 24
3.2.2 Local Programs . . . . . 25
3.2.3 Global/Local Programs . . . . . 26

*Copyright © 1995 Thinking Machines Corporation*

3.3 Partitions and Addresses . . . . . 26
3.4 The CM-5 Execution Model . . . . . 27
3.4.1 Hostless and Host/Node Programs . . . . . 27
3.4.2 Memory Maps . . . . . 28
3.5 Data Storage . . . . . 28
3.6 Languages . . . . . 29
3.6.1 Array Storage in Global, Local, and Global/Local Programs . 30
3.6.2 C* . . . . . 31
3.6.3 DPEAC . . . . . 32

**Chapter 4 Cooperative Message Passing . . . . . 35**

4.1 Buffers and Arrays . . . . . 36
4.1.1 Serial Arrays . . . . . 38
4.1.2 Parallel Arrays . . . . . 38
4.1.3 Vector Serial Arrays . . . . . 41
4.2 Reference Pages . . . . . 46
CMMD_send_block
CMMD_send_block_v . . . . . 47
CMMD_receive_block
CMMD_receive_block_v . . . . . 51
CMMD_send_and_receive
CMMD_send_and_receive_v . . . . . 54
CMMD_swap
CMMD_swap_v . . . . . 58

**Chapter 5 Cooperative Auxiliary Functions . . . . . 61**

5.1 Node Information Functions . . . . . 61
5.2 Message-Pending Function . . . . . 62
5.3 Message Accessor Functions . . . . . 62
5.4 Availability Functions . . . . . 63
5.5 Message-Matching Function . . . . . 64
5.6 Reference Pages . . . . . 64
CMMD_self_address . . . . . 65
CMMD_partition_size . . . . . 67
CMMD_msg_pending . . . . . 68
CMMD_bytes_received
CMMD_bytes_sent . . . . . 69

CMMD_msg_sender
CMMD_msg_tag ..... 70
CMMD_available_sends
CMMD_available_receives ..... 71

**Chapter 6 Asynchronous Message Passing ..... 73**

6.1 Asynchronous Message Passing ..... 73
6.1.1 MCBs ..... 74
6.1.2 Buffer Handling and Restrictions ..... 75
6.2 Order of Message Delivery ..... 76
6.3 Callback Functions ..... 78
6.3.1 Callback Functions in C and Fortran ..... 79
6.3.2 Restrictions on Callback Functions ..... 79
6.3.3 Active Messages ..... 80
6.4 Program Termination ..... 80
6.5 Reference Pages ..... 80
CMMD_send_async ..... 81
CMMD_receive_async ..... 85
CMMD_send_noblock ..... 88

**Chapter 7 Asynchronous Message-Passing Auxiliary Functions ..... 91**

7.1 Releasing Message Control Blocks ..... 91
7.2 Node Information Functions ..... 92
7.3 Pending Message Functions ..... 92
7.4 MCB Accessor Functions ..... 92
7.5 Message Completion Functions ..... 93
7.6 Waiting for Asynchronous Messages ..... 94
7.7 Determining Resource Availability ..... 94
7.8 Message-Matching Function ..... 94
7.9 Reference Pages ..... 94
CMMD_free_mcb ..... 95
CMMD_mcb_pending ..... 97
CMMD_mcb_node
CMMD_mcb_source
CMMD_mcb_dest ..... 99

*Copyright © 1995 Thinking Machines Corporation*

CMMD_mcb_tag
CMMD_mcb_bytes
CMMD_mcb_buffer ..... 101
CMMD_msg_done ..... 102
CMMD_all_msgs_done ..... 104
CMMD_all_sends_done
CMMD_all_receives_done ..... 105
CMMD_msg_wait
CMMD_all_msgs_wait ..... 106

**Chapter 8 Virtual Channels ..... 107**

8.1 Using Virtual Channels ..... 108

8.2 Virtual Channel Functions ..... 112
8.2.1 Establishing a Channel ..... 112
8.2.2 Sending Data through a Channel ..... 113
8.2.3 Reading from and Resetting a Channel ..... 114
8.2.4 Closing a Channel ..... 115
8.2.5 Testing for Completion of Channel Operations ..... 115
8.2.6 Restrictions on Channels ..... 116

8.3 Channel Function Reference Pages ..... 117
CMMD_open_send_channel
CMMD_open_receive_channel ..... 118
CMMD_send_channel_status
CMMD_receive_channel_status ..... 121
CMMD_is_channel_writable
CMMD_is_channel_readable ..... 124
CMMD_write_channel ..... 126
CMMD_reset_channel ..... 128
CMMD_close_send_channel
CMMD_close_receive_channel ..... 130
CMMD_all_channels_free
CMMD_all_channels_free_wait ..... 132

**Chapter 9 Global Communication ..... 135**

9.1 Broadcasts ..... 136

9.2 Scans, Reduces, and Concatenation ..... 137
Reduces ..... 139
Scans ..... 139
Segmented Scans ..... 140
Concatenation ..... 141

Version 3.3, April 1995
Copyright © 1995 Thinking Machines Corporation

9.3 Host/Node Global Functions ..... 141
9.4 Broadcast Functions ..... 141
CMMD_bc_to_nodes
CMMD_receive_bc_from_node ..... 142
9.5 Reduce Functions ..... 144
CMMD_reduce_type ..... 145
CMMD_reduce_type_start ..... 148
CMMD_reduce_done ..... 151
CMMD_reduce_type_finish ..... 153
CMMD_reduce_v ..... 156
9.6 Scan Functions ..... 159
CMMD_scan_type ..... 160
CMMD_scan_type_start ..... 167
CMMD_scan_done ..... 174
CMMD_scan_type_finish ..... 175
CMMD_scan_v ..... 181
9.7 Concatenation Function ..... 185
CMMD_concat_with_nodes ..... 186

**Chapter 10 Synchronization ..... 189**
10.1 Automatic Synchronization ..... 190
10.2 Explicit Synchronization ..... 191
10.3 Global Synchronization Functions ..... 192
CMMD_sync_with_nodes ..... 194
CMMD_sync_with_nodes_start
CMMD_sync_done
CMMD_sync_with_nodes_finish ..... 195
CMMD_set_global_or
CMMD_get_global_or ..... 197

**Chapter 11 Interrupts and Polling ..... 199**
11.1 Interrupts and Polling ..... 199
11.1.1 Interrupts vs. Polling — Usage and Performance ..... 201
11.1.2 Implicit Polling by CMMD Communication Function ..... 204
11.1.3 Polling by CMMD Inquiry Functions ..... 205
11.1.4 Implicit Polling by External Functions ..... 205

*Copyright © 1995 Thinking Machines Corporation*

11.2 Function Dictionary ..... 206
CMMD_enable_interrupts
CMMD_disable_interrupts ..... 207
CMMD_interrupt_status
CMMD_inside_interrupt_handler ..... 209
CMMD_poll ..... 211
11.3 Polling Example (Using Channel Functions) ..... 212

**Chapter 12 CMAML: Active Messages ..... 215**

12.1 CMAML ..... 215
12.2 Active Messages ..... 217
12.2.1 Requests, Replies, and RPCs ..... 219
12.2.2 Processing the Data Stream ..... 220
12.2.3 Why Are There Different Active Message Types? ..... 223
12.3 Long Active Messages ..... 224
12.3.1 VA-Class Active Messages ..... 225
12.3.2 VAPOP-Class Active Messages ..... 225
12.3.3 ARRPOP-Class Active Messages ..... 226
12.4 Active Message Function Dictionary ..... 228
Short Active Messages ..... 229
VA-Class Long Active Messages ..... 233
VAPOP-Class Long Active Messages ..... 238
ARRPOP-Class Long Active Messages ..... 243
12.4.1 Active Messages: Popping Data ..... 249
CMAML_pop
CMAML_popd ..... 251
CMAML_poptofirst, CMAML_poptofirstd,
CMAML_poptofirst_ra, CMAML_poptofirst_ra_d,
CMAML_poptofirst_rla, CMAML_poptofirst_rla_d .. 254
CMAML_popn
CMAML_popnd ..... 257
12.4.2 Active Messages: Informational Functions ..... 263
CMAML_n_to_pop ..... 264
CMAML_pn_long_am_nwords
CMAML_cp_long_am_nwords ..... 266
12.5 Examples ..... 268
12.5.1 Example: Sending an RPC Message ..... 268
12.5.2 Example: Sending Request/Reply Messages ..... 270

Copyright © 1995 Thinking Machines Corporation

**Chapter 13 CMAML: Block Data Transfers . . . . . 273**

13.1 How Block Data Transfers Work . . . . . 273
13.1.1 Blocking and Nonblocking Transfers . . . . . 278
13.1.2 Contents of the Receive Port Data Structure . . . . . 280
13.2 Sending and Receiving Arrays . . . . . 280
`CMAML_scopy`, `CMAML_pcopy` . . . . . 282

**Chapter 14 CMAML: Handlers and Auxiliary Functions . . . . . 293**

14.1 Handler Functions . . . . . 293
14.1.1 Properties and Restrictions of Handlers . . . . . 297
14.2 Active Message Auxiliary Functions . . . . . 299

**Chapter 15 Input/Output . . . . . 307**

15.1 CMMD I/O Modes . . . . . 308
15.1.1 Local Independent Mode . . . . . 311
15.1.2 Global Independent Mode . . . . . 313
15.1.3 Global Synchronous Broadcast Mode . . . . . 315
15.1.4 Global Synchronous Sequential Mode . . . . . 319
15.2 Setting the File Descriptor Mode . . . . . 322
15.3 I/O Error Handling . . . . . 323
15.4 Using Append Mode for Global Output Files . . . . . 323
15.5 Buffered Streams: Supported, but Not Guaranteed . . . . . 326
15.6 Functions That Support Extra-Large Files . . . . . 326
15.6.1 Managing I/O Rearrange Space . . . . . 327
15.7 Other UNIX Support . . . . . 329
15.8 Reference Pages . . . . . 331
`CMMD_set_open_mode`
`CMMD_get_open_mode` . . . . . 332
`CMMD_global_open` . . . . . 334
`CMMD_global_creat` . . . . . 336
`CMMD_global_fopen` . . . . . 337
`CMMD_set_io_mode`
`CMMD_fset_io_mode` . . . . . 339
`CMMD_get_io_mode`
`CMMD_fget_io_mode` . . . . . 341
`CMMD_set_rearrange_size` . . . . . 342
`CMMD_get_rearrange_size` . . . . . 344
`CMMD_max_rearrange_size` . . . . . 346

*Copyright © 1995 Thinking Machines Corporation*

15.9 Reference Pages, File Pointers ..... 348
dlength ..... 349
dseek ..... 350
dtell ..... 352
dftruncate ..... 353
15.10 Sockets ..... 355
15.10.1 Restrictions ..... 355
15.10.2 For Further Information ..... 356
15.10.3 Reference Page, Sockets ..... 356
CMMD_global_socket ..... 357
15.11 Fortran I/O from CMMD ..... 359
15.11.1 Conditional Write Statements ..... 359
15.11.2 Fortran 77 or CM Fortran? ..... 359
15.11.3 Buffered I/O and Fortran 77 ..... 360
15.11.4 CM Fortran ..... 361
15.11.5 Reference Pages, Fortran I/O Functions ..... 362
CMMD_set_append_mode ..... 363
CMMD_set_unit_buffer ..... 364
CMMD_global_write
CMMD_global_read ..... 365
15.12 For Wizards Only — Writing Device-Dependent Files ..... 367
15.12.1 Physical Read/Write Restrictions ..... 368
15.12.2 Physical Blocking Factor ..... 368
15.12.3 Reference Pages ..... 368
CMMD_physical_blocking ..... 369
CMMD_physical_write ..... 370
CMMD_physical_read ..... 371

**Chapter 16 Error Handling ..... 373**
CMMD_get_errno ..... 374
CMMD_error_string ..... 376
CMMD_error ..... 377

**Chapter 17 CMMD Timers ..... 379**
17.1 Using the CMMD Timers ..... 380
17.2 Node Timing Functions ..... 380
CMMD_node_timer_clear ..... 381
CMMD_node_timer_start ..... 382
CMMD_node_timer_stop ..... 383

Version 3.3, April 1995
Copyright © 1995 Thinking Machines Corporation

CMMD_node_timer_elapsed
CMMD_node_timer_busy
CMMD_node_timer_idle ..... 384

**Chapter 18 Changing Defaults ..... 387**

18.1 Changing the Message-Matching Function ..... 387
18.1.1 Implementation: How CMMD Uses the Matching Function . 388
18.1.2 Setting the Matching Function ..... 389

18.2 Reference Pages ..... 391
CMMD_set_msg_matching_fcn ..... 392
CMMD_reset_partition_size ..... 394
CMMD_enable_safety
CMMD_disable_safety ..... 397

**Chapter 19 Host/Node Programming Environment ..... 399**

19.1 Enabling the Host/Node Programming Environment ..... 402

19.2 Obtaining the Host ID ..... 402

19.3 Sending and Receiving Messages ..... 402
19.3.1 Serial Data Only ..... 402
19.3.2 Active Messages ..... 403

19.4 Synchronizing the Host with the Nodes ..... 403

19.5 Broadcasts and Concatenation ..... 404

19.6 Reduces from Nodes to Host ..... 404

19.7 Terminating a Host/Node Program ..... 405

19.8 Invoking an I/O Server on the Host ..... 405
An Example ..... 406

19.9 Further Server Functions ..... 407

19.10 Reference Pages ..... 407
CMMD_enable
CMMD_enable_host ..... 409
CMMD_host_node ..... 410
CMMD_sync_host_with_nodes
CMMD_sync_with_host ..... 411
CMMD_bc_from_host
CMMD_receive_bc_from_host ..... 412
CMMD_bc_from_host_v
CMMD_receive_bc_from_host_v ..... 414

*Copyright © 1995 Thinking Machines Corporation*

CMMD_distrib_to_nodes
CMMD_receive_element_from_host ..... 416
CMMD_gather_from_nodes
CMMD_concat_elements_to_host ..... 418
CMMD_reduce_from_nodes_type
CMMD_reduce_to_host_type ..... 420
CMMD_reduce_from_nodes_v
CMMD_reduce_to_host_v ..... 423
CMMD_service_loop
CMMD_global_suspend_servers
CMMD_poll_for_services ..... 426

**Appendix A Extending CMAML ..... 429**

A.1 Hardware Tag Allocation and Registration ..... 430

A.2 Hardware Tag Handler Functions ..... 430

A.3 CMAML Extension Functions ..... 431

A.3.1 Allocating and Freeing Tags ..... 431

A.3.2 Registering Hardware Tag Handlers ..... 431

A.3.3 Processing Messages ..... 432

A.3.4 Using Hardware Tag Handlers ..... 436

**Appendix B Implementation of Messages ..... 439**

B.1 Data Network Packets ..... 439

B.2 Handshaking ..... 440

B.3 Processing Packets ..... 441

B.3.1 Polling and Interrupts ..... 443

Handling Incoming Messages ..... 445

Returning Control ..... 446

B.3.2 More on Handshaking: The async and noblock Functions .. 446

**Index ..... 451**

**Function Index ..... 455**
