Q13. What is good about the course?

1. Can give us an opportunity to work in a team
2. Effectively designed for students to understand the materials better. Encourage everyone to do well in general.
3. Excellent in teaching, well prepared teaching material(slides), good implementation and presentation of subject material and concepts. Interactive teaching and enjoyable.
4. Kind Professor, Love!Sung!!!!!
5. Lots of useful information is taught that is helpful (debugging and programming techniques) and is not found in other courses.
6. None
7. Prof. Kim is a very enthusiastic and experienced professor. I can see he put a lot of efforts in the lectures and it made the lectures really interesting and inspiring. Overall I enjoyed the course very much and I believe this course has improved a lot compare to the previous year (mostly taught by Prof. Lochovsky). Prof Kim is also very caring that he always care for the need of every individual students. I learnt a lot from the course.
8. Professor always encourage students and kind.
9. Writing a new application instead of learning twitter would be more interesting.

Q14. What could be done to improve the course?

1. Good enough already!
2. Please teach the students, not just release the homework and let them deal with it
3. The quality of the TA are rather inconsistent. The main TA Ning is a very good indeed. However pretty much all the other TAs are quite meh. Some of them have pretty bad English and they made the lab and tutorial session rather boring. The course would be much better if more experienced TA are chosen.
4. Workload too high
5. more guideline can be given for the project.

Note: Please note that the aggregate statistics for department, school and university will be subjected to an updating and finalized on 4 July 2013
