phone: (857) 222-7397

## Technical Expertise

**Applied machine learning and data mining**, with special focus on the analysis and modeling of mid to large-scale, real-world data and information sources as a means to understand and utilize this information in more valuable ways (e.g.; new computer tools, applications, business models, services). Development of algorithms and mathematical models primarily employing probabilistic models/inference and convex optimization. Application domains include learning using the knowledge of multiple experts/sources, identification of concepts from free text, information extraction, computational advertising, health record analysis, medical imaging, and computer vision.

## Academic Background

<b>Research Associate</b> Massachusetts Institute of Technology.	Feb 2004
Computer Science and Artificial Intelligence Laboratory (CSAIL). Cambridge, MA USA.	Oct 2004
<b>Postdoctoral Research Fellow</b> University of Toronto.	Jan 2002
Probabilistic and Statistical Inference Group. Electrical Engineering. Toronto, ON Canada.	Jan 2004
<b>Ph.D. Computer Science</b> Boston University.	Jan 2000
Computer Science Department. Boston, MA USA.	Dec 2002
<b>M.A. Computer Science</b> Boston University.	Sep 1996
Computer Science Department. Boston, MA USA.	Dec 1999
<b>B.Eng. Informatics Engineering</b> Universidad Centro Occidental <i>Lisandro Alvarado</i> .	Sep 1989
Faculty of Sciences. Venezuela. [ranked first in class - 1/123]	Jul 1995

## Work Experience

<b>Senior Scientist</b>	2010-Curr.
Yahoo! Labs. Sunnyvale, CA Design and development of machine learning models and algorithms for large-scale analysis of web-traffic, user modeling, and computational advertising.	
<b>Product/Project Manager</b>	2009-2010
<b>Senior Staff Scientist</b>	2007-2010
<b>Staff Scientist</b>	2004-2007
<b>IKM CAD and Knowledge Solutions. Siemens Healthcare. Malvern, PA</b> Design and development of machine learning (ML) models and algorithms for analysis of text, images, and structured data from health records in general. Coordinate interaction between text processing ML research and software platform. Basic Business Development. <b>Other:</b> Coordinator of group's patent portfolio (70-75 patent decisions/year). Coordinate recruiting for various technical positions. Prepare grant applications.	
<b>Postdoctoral Associate</b>	2004
Computer Science and Artificial Intelligence Laboratory. Massachusetts Institute of Technology. Cambridge, MA Designed and implemented novel approaches for approximate probabilistic inference in graphical models (probability models), called <i>Focused Inference</i> [27]. The main motivation was to solve probabilistic inference problems for applications with a large number of variables that interact in ways for which exact methods are not tractable.	

<b>Postdoctoral Fellow</b>	2002-2003
<b>Probabilistic and Statistical Inference Group. University of Toronto. Toronto, ON</b>	
Designed a novel multi-purpose method for general statistical image processing covering problems such as de-noising, super-resolution, non-photorealistic rendering, edge detection, texture transfer/generation. Developed various approaches for machine learning for pattern recognition including probabilistic methods for clustering and visualization, generative models of affinity matrices, and approximate inference.	
<b>Research Intern</b>	1999
<b>Mitsubishi Electric Research Laboratories (MERL). Cambridge, MA</b>	
Analyzed probability models with entropic priors. Developed and implemented algorithms for human body pose estimation and tracking using Hidden Markov Models.	
<b>Research/Teaching Assistant</b>	1997-2001
<b>Computer Science Research Lab. Boston University. Boston, MA</b>	
Developed and implemented algorithms for learning probabilistic models from rendering synthetic computer graphics data, 3D articulated pose inference, visual tracking, and integration of generative and discriminative models. Coordinated undergraduate project on 3D body pose synthesis. Carried out recitations, grading, and student tutoring for various computer vision and graphics classes. Topics included: shape classification, face recognition and detection, image segmentation, physics-based computer animation and rendering, texture mapping, rendering 3D models, image mosaics, etc.	
<b>Software Engineer</b>	1994-1996
<b>Industrial Development and Research Center. Venezuela</b>	
Software design and development for financial and retail business applications (C/C++)	

### Awards and Fellowships

Distinguished Paper Award, <i>International Joint Conference on Artificial Intelligence</i> .	2007
University of Toronto. Elect./Comp. Engineering Postdoctoral Fellowship, Canada.	2002-2003
<i>Neural Information Processing Systems (NIPS)</i> Travel Award. Denver, CO, USA.	2000
Computer Science Research Scholarship, Boston University. Boston, MA, USA.	1998-2001
UCLA-CONICIT Graduate Fellowship Award for Ph.D. in Computer Science.	1996-2000
<i>José Félix Rivas</i> National Medal (III class). National Merit Award. Venezuela.	1996
<i>Magna cum laude</i> , first in graduating class (ranked 1/123). Informatics Engineering. Universidad Centroccidental (UCLA), Venezuela.	1995

### Publications in Proceedings/Journals (peer reviewed)

1. S. Yu, B. Krishnapuram, R. Rosales, and B. Rao. **Bayesian Co-Training**. To appear in *Journal of Machine Learning Research (JMLR)* 2011.

## Software Engineering

**Languages:** Assembly (x86 and VAX), C/C++, HTML, Java (medium), Matlab, OpenGL, Pig, Python, SQL, XML.

**Technologies:** Hadoop, Map-Reduce.

**Software Development:** hands-on experience with software development processes as manager and developer, Waterfall and Agile methodologies, and Object-Oriented programming.

## Other

**Spoken languages:** fluent in Spanish

**Service:** founding board member and communications liaison for Siemens Employee Resource Group

### Recent Professional Service

**Program committee/reviewer for the following (recent) conferences:** International Conference on Artificial Intelligence and Statistics (AISTATS) 2009, Computer Vision and Pattern Recognition (CVPR) 2011-2007, Neural Information Processing Systems (NIPS) 2008-2007, Bioinformatics and Biomedicine 2009-2008 (BIBM), International Conference on Machine Learning (ICML) 2008, European Conference on Computer Vision (ECCV) 2008, Knowledge Discovery and Data Mining (KDD) 2007

**Reviewer for the following (major) journals:** Machine Learning Journal, Transactions on Pattern Analysis and Machine Intelligence, Transactions on Image Processing, Neurocomputing, Transactions on Neural Networks, Transactions on Signal Processing, Data Mining and Knowledge Discovery, International Journal of Computer Vision, Pattern Recognition Letters

**Guest Editor:** Journal of Data Mining and Knowledge Discovery, Special Issue Mining Medical Data (2010)

**Organizer:** Workshop on Predictive Models for Personalized Medicine. As part of Neural Information Processing Systems Conference (2010)
