I.   SYSTEM CHANGE LOG

MCR   MODIFICATIONS FOR MSS 32.4a

9999 Salvager fixed to not take faults when there is garbage in
     the last few words of a directory.

3052 Changes rcp_tape_ to make an additional heuristic label
     check before asking for authentication from the operator.
     The operator should see fewer authentication requests,
     especially when mounting backup tapes.

2636 Fixes a "dprint & delete" problem in the reload program.
