 SUBJECT: Installation of MSS 32.4c

I. SYSTEM CHANGE LOG

MCR MODIFICATIONS FOR MSS 32.4c

3052 Changes `rcp_tape` to make an additional heuristic label check before asking for authentication from the operator. The operator should see fewer authentication requests, especially when mounting backup tapes. Actually, this was supposed to be in MSS 32.4a but the wrong source was copied by the installer.

II. SEGMENT CHANGE LOG

SEGMENT NAME	BOUND SEGMENT
<code>rcp_tape_.pl1</code>	R <code>bound_rcp_</code>
