

TO: MIB Distribution  
FROM: Arlene Scherer  
DATE: September 7, 1973  
SUBJECT: On Line Installation Changes

The following is a list of changes to the standard service system, maintenance tools, author maintained and installation maintained libraries for the week beginning September 4, 1973.

HOW TO READ THIS LISTING:

- Item 1 may be the date the segment was updated.
- Item 2 may be the system library in which the segment is maintained.
- |       |   |
|-------|---|
| TOOLS | Is the maintenance tools library  |
| SSS   | Is the standard service system  |
| AM    | Is the author maintained library<br>(Installation maintained software is currently kept in AM also) |
| LANG  | Is the languages library.   |
- Item 3 Is the name of the object segment or component being updated.
- Item 4 Is the action which was taken:  
added  
replaced  
deleted  
moved

NOTE: The library name and date will appear only before the names of bound segments or single unbound object segments, but will not appear before the names of object components within bound segments. Therefore, if no date or library name appears, you may assume that the name refers to an object component. Just trace down to the next date and library name to learn the name of the object segment itself.

Note that changing the name or the language type of a segment involves a delete of the old segment and an add of the new one.
